"Tribute To Doctors"

Bachelor of Engineering

In
Computer Science and Engineering

Submitted by: NAVEEN S MATH (3BR19CS097)

BALLARI INSTITUTE OF TECHNOLOGY AND MANAGEMENT
2021

ABOUT THE COMPANY

IC Solution (ICS) is a digital service provider that aims to provide software, designing and marketing solutions to individuals and businesses. At ICS, we believe that service and quality is the key to success

We provide all kinds of technological and designing solutions from Billing Software to Web Designs or any custom demand that you may have. Experience the service like none other!

Some of our services include:

Development - We develop responsive, functional and super-fast websites.
We keep User Experience in mind while creating websites. A website should load quickly and should be accessible even on a small view-port and slow internet connection.

Mobile Application - We offer a wide range of professional Android, iOS & Hybrid app development services for our global clients, from a start up to a large enterprise.

Design - We offer professional Graphic design, Brochure design & Logo design. We are experts in crafting visual content to convey the right message to the customers.

Consultancy - We are here to provide you with expert advice on your design and development requirement.

Videos - We create a polished professional video that impresses your audience.

OVERVIEW OF THE PROJECT

Project Name: Tribute to Doctors

Team Members: 1. NAVEEN S MATH
2. AKASH B
3. JASMINE KARAM

This project is based on Web Development And its Applications. The main objective of this project is to learn the implementation of HTML, CSS and JavaScript. The basic webpage of this project is created using HTML and styling of the webpage is done using CSS.

This webpage is about the deadly Covid-19 and the Covid frontline warriors.

ABOUT COVID-19

.

Coronavirus disease 2019 (**COVID-19**) is a contagious disease caused by severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2). The first known case was identified in Wuhan, China, in December 2019. The disease has since spread worldwide, leading to an ongoing pandemic. The official names COVID-19 and SARS-CoV-2 were issued by the WHO on 11 February 2020. Tedros Adhanom explained: CO for corona, VI for virus, D for disease, and 19 for 2019 (the year in which the outbreak was first identified). We know that the disease is caused by the SARS-CoV-2 virus, which spreads between people in several different ways. The virus can spread from an infected person's mouth or nose in small liquid particles when they cough, sneeze, speak, sing or breathe.

This virus is spreading exponentially region wise. Countries are banning gatherings of people to the spread and break the exponential curve. Many countries are locking their population and enforcing strict quarantine to control the spread of the havoc of this highly communicable disease. As of Sept, 2021, more than 3.3 crore cases of COVID-19 have been confirmed in India resulting in around 4.41 lakhs deaths. Clearly, the corona virus outbreak situation cannot be taken lightly.

Significance of Doctors during Covid-19 pandemic

Doctors and healthcare workers have been playing crucial role in the fight against the Covid-19 pandemic for the last one and a half years. Doctors, nurses and people working in health-care sectors are particularly vulnerable to the highly infectious disease. In response to the global pandemic, the under-resourced doctors are facing unprecedented challenges. The list of the sleep-deprived heroes includes doctors, nurses, medical cleaners, pathologists, paramedics, ambulance drivers, and health-care administrators. In the fight against coronavirus, the brave medical army stands strong with thermometers, stethoscopes, and ventilators as their weapons. Not to forget, medical researchers are working day in and night out against all odds, hoping to find the antidote to the disease.

Many have lost their lives while treating Covid-19 patients worldwide. According to the Indian Medical Association, 798 doctors died during the second wave this year and 748 doctors succumbed to Covid-19 in the first wave last year. While they are putting their own health, families, and most importantly their own lives at risk, the least we can do is appreciate their efforts and cooperate by staying safe indoors.

TOOLS USED

Software Requirements

- Visual Studio Code 2019.
- Google Chrome or Microsoft Edge of latest version.
- Front End: HTML, CSS, JS (optional)
- Linux 7.1 or Windows XP/7/8/10 OS or Mac OS

Hardware Requirements

- Pentium 200-MHz computer with a minimum of 64 MB of RAM (128 MB of RAM recommended).
- Monitor with a refresh rate of at least 40Hz for a smooth GUI experience (optional).

  <h1>Salute The COVID Heroes Who Selflessly <br>Helped India Fight COVID-19</h1>
  <div class="text0">
   <p>
```

Doctors and healthcare workers have been playing crucial role in the fight against the Covid-19 pandemic for the last one and a half years. Many have lost their lives while treating Covid-19 patients worldwide. According to the Indian Medical Association, 798 doctors died during the second wave this year and 748 doctors succumbed to Covid-19 in the first wave last year. On National Doctors' Day, the HealthSite salutes the heroes for their selfless services amid COVID-19 pandemic and honour their contribution to the society.

Putting their own lives at risk with selfless determination for the sake of saving lives, they truly are our heroes in these challenging times. While they are putting their own health, families, and most importantly their own lives at risk, the least we can do is appreciate their efforts and cooperate by staying safe indoors. That being said, it is good to see tributes pouring in for all the medical heroes working in scrubs.

 We'd now like to highlight the heroic efforts of some courageous and inspiring doctors who lost their lives during this pandemic.

     <div class="text3">
      <h3>Dr.Jagadish Rai</h3>
      <p>In October, 70-year-old, Dr Jagadish Rai, an obstetrician and a general practitioner working in a small town in coastal Karnataka for the last 40 years, contracted COVID-19 in the line of duty and succumbed to the disease, setting another example of the selfless service that doctors and other healthcare workers offer. Despite being a senior citizen and having underlying leukemia, Dr Jagadish Rai continued to work six and a half days a week even during a pandemic. Dr Rai had his own clinic and was associated with a nursing home close by. He was not posted on COVID duty per se officially but continued seeing patients in his private practice, many of whom were COVID positive, who were denied medical attention elsewhere, shared Dr Rai's daughter.

Salute The COVID Heroes Who Selflessly Helped India Fight COVID-19

Doctors and healthcare workers have been playing crucial role in the fight against the Covid-19 pandemic for the last one and a half years. Many have lost their lives while treating Covid-19 patients worldwide. According to the Indian Medical Association, 798 doctors died during the second wave this year and 748 doctors succumbed to Covid-19 in the first wave last year. On National Doctors' Day, the HealthSite salutes the heroes for their selfless services amid COVID-19 pandemic and honour their contribution to the society.

Putting their own lives at risk with selfless determination for the sake of saving lives, they truly are our heroes in these challenging times. While they are putting their own health, families, and most importantly their own lives at risk, the least we can do is appreciate their efforts and cooperate by staying safe indoors. That being said, it is good to see tributes pouring in for all the medical heroes working in scrubs.

We'd now like to highlight the heroic efforts of some courageous and inspiring doctors who lost their lives during this pandemic.

DR.**AGGARWAL**

Dr.Aggarwal

Picture abhi baaki hai. The show must go on," Padma Shri awardee Dr K K Aggarwal said in one of his last educational videos about Covid before adding that he too was suffering from the virus. "I have Covid pneumonia which is progressive. But even then, remember Raj Kapoor's words 'the show must go on'." Dr Aggarwal passed away at Delhi's All India Institute of Medical Sciences after a long battle with the virus on 19 May, 2021 The 62-year-old was a cardiologist, head of the Heart Care Foundation of India (HCFI) and former president of the Indian Medical Association (IMA). He received the Dr BC Roy Award in 2005 and the Padma Shri in 2010.

Dr.Anas Mujahid

26-year-old, Anas Mujahid, a junior Resident Doctor at Delhi's COVID dedicated Guru Teg Bahadur Hospital is another COVID warrior India lost during the second wave of the COVID-19 pandemic. Dr Mujahid had minor symptoms like sore throat and tested positive in an antigen test at the hospital. In a rare case of sudden progression, he collapsed soon after and died due to intracranial bleeding. He is survived by his parents and four siblings. Talking about the sudden demise of Dr Mujahid, his friend and colleague Dr Aamir Sohail said, "It was shocking for everyone who knew him. He had no comorbidity. He was a very dedicated doctor. He was planning to get the jab in the next few days."

DR.**ANAS MUJAHID**

DR.**JAGADISH RAI**

Dr.Jagadish Rai

In October, 70-year-old, Dr Jagadish Rai, an obstetrician and a general practitioner working in a small town in coastal Karnataka for the last 40 years, contracted COVID-19 in the line of duty and succumbed to the disease, setting another example of the selfless service that doctors and other healthcare workers offer. Despite being a senior citizen and having underlying leukemia, Dr Jagadish Rai continued to work six and a half days a week even during a pandemic. Dr Rai had his own clinic and was associated with a nursing home close by. He was not posted on COVID duty per se officially but continued seeing patients in his private practice, many of whom were COVID positive, who were denied medical attention elsewhere, shared Dr Rai's daughter.

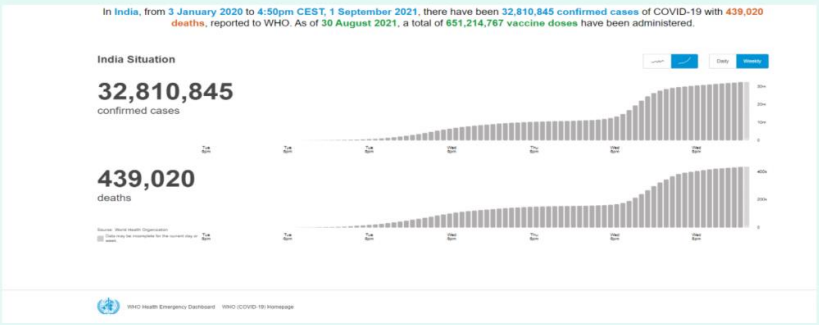
HOME HEROES STATISTICS

222,406,582
Confirmed cases(Globally)

(Click here for live stats)

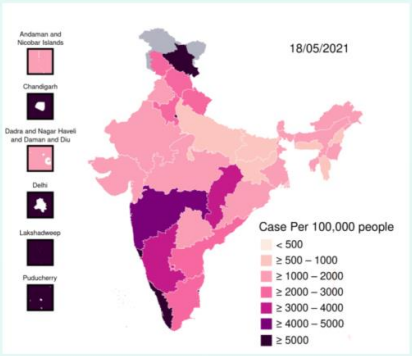
In **India**, from **3 January 2020** to **4:50pm CEST, 1 September 2021**, there have been **32,810,845 confirmed cases** of COVID-19 with **439,020 deaths**, reported to WHO. As of **30 August 2021**, a total of **651,214,767 vaccine doses** have been administered.



India is reporting 40,839 new infections on average each day, 10% of the peak — the highest daily average reported on May 9.

There have been 33,096,718 infections and 441,411 coronavirus-related deaths reported in the country since the pandemic began.

The average number of COVID-19 deaths reported each day in India has been decreasing for 10 days straight



The second wave placed a major strain on the healthcare system, including a shortage of liquid medical oxygen due to ignored warnings which began in the first wave itself, logistic issues, and a lack of cryogenic tankers.

The number of new cases had begun to steadily drop by late-May; on 25 May, the country reported 195,994 new cases—its lowest daily increase since 13 April. However, the mortality rate has remained high.

On 25 August 2021, Soumya Swaminathan said that India "may be entering some kind of stage of endemicity where there is low level transmission or moderate level transmission going on" but nothing as severe as before, in other words India is learning to live with the virus.
